Get Vehicle Location by IMEI No

Http Method: **GET**

API URL: <http://trackapi.fleetroot.com/api/getvehiclelocation>

Require

Parameter	Value
apiKey	API Key
imeino	Vehicle IMEI No

Response

Reponse	Description
status	200 – Success 401 - Unauthorized
message	Error Description
results	Collection of object.

Sample

```
{
  status: [200],
  results : [
    {
      "imeino": "E2227",
      "timestamp": "2017-12-25T01:20:00",
      "latitude": 25.1654854,
      "longitude": 72.1548541,
      "locationname": "Dubai",
      "vehiclename": "1117",
      "vehiclegroupname": "Medium",
      "trackingstatus": 4
    }
  ]
  message : ""
}
```

Get Vehicle Location by Vehicle Id

Http Method: **GET**

API URL: <http://trackapi.fleetroot.com/api/getvehiclelocation>

Require

Parameter	Value
apiKey	API Key
id	Vehicle Id

Response

Reponse	Description
status	200 – Success 401 - Unauthorized
message	Error Description
results	Collection of object.

Sample

```
{
  status: [200],
  results : [
    {
      "imeino": "E2227",
      "timestamp": "2017-12-25T01:20:00",
      "latitude": 25.1654854,
      "longitude": 72.1548541,
      "locationname": "Dubai",
      "vehiclename": "1117",
      "vehiclegroupname": "Medium",
      "trackingstatus": 4
    }
  ]
  message : ""
}
```

Tracking Status Detail

Value	Description
1	Running
2	Idling
3	Stopped
4	Disconnected

Get All Vehicle Current Status

Http Method: **GET**

API URL: <http://trackapi.fleetroot.com/api/getallvehiclecurrentstatus>

Require

Parameter	Value
apiKey	API Key

Response

Reponse	Description
status	200 – Success 401 - Unauthorized
message	Error Description
results	Collection of object.

Sample

```
